RESTOMOD CLASS

All Generations

Definition: At its core, a restomod is a classic vehicle that has been carefully restored to maintain its original styling and character, while also being upgraded with modern parts and systems for higher levels of performance, safety, comfort, and drivability. Unlike purely stock restorations that aim to return a vehicle to its factory condition, restomods introduce innovations that weren't available at the time of production. Think upgraded brakes, independent suspension, digital instrumentation, Bluetooth audio, and increasingly, high-performance electric drivetrains. Source Everatti.com
